DESCRIPTION

The new exhaust system for the Peugeot 103 is characterized by its placement on the right side and its outlet at the bottom of the motorcycle. This exhaust is designed for all classic motorcycle enthusiasts who want to take their bikes to the next level, giving them a touch of modernity and the latest technology. With this new exhaust, we achieve the maximum performance of the motorcycles with the aim of enjoying them to the fullest. Moreover, by just changing the exhaust, you will notice a very significant improvement, so no additional modifications to the motorcycle will be necessary.

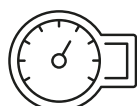

This exhaust system is developed for original 50cc/70cc sport-type cylinders. Thanks to its design, this exhaust provides maximum power at low and medium RPM ranges, resulting in a notable improvement in acceleration and top speed.

The exhaust offers a choice of several silencer colors based on your preference; you can choose between black, black with a red cap, black with a blue cap, carbon, and carbon kevlar. It also has CE certification, making it road legal.
